The new "2023 Ophthalmic Surgical Instruments Market Report" provides the latest coverage of various sustainability initiatives and recommendations from the ESCRS and AAO to reduce operating room waste caused by disposable devices. A new chapter on sustainability looks at the challenges that manufacturers face and includes a new rating scale showing the predicted impact of these initiatives on future sales of each product category.

The report connects our surgical procedure forecast by ophthalmic subspecialty to our forecast for surgical instruments. It also lists the latest company acquisitions and consolidations among market competitors that have created globally dominant providers.
