PUBLISHED
August 2024

The new “2024 Glaucoma Surgical Device Market Report” provides an in-depth look at a record 18 early-stage glaucoma device and laser companies. Iantrek, led by one of ophthalmology’s most prolific innovators, is preparing to launch several revolutionary glaucoma treatments, including the AlloFlo, the first biotissue stent.

Several promising new subconjunctival products are also examined. These include Avisi Technologies’ ultrathin filtration plate implant, Myra Vision’s adjustable post-op shunt, and Ciliatech’s uveoscleral filtration acrylic plate.

Market Scope

2024 Glaucoma Surgical Device Market Report

The “2024 Glaucoma Surgical Device Market Report” offers a comprehensive analysis of the current global market for glaucoma devices, as well as a discussion of important trends, an examination of upcoming products that will impact the market, and a review of other key factors shaping future success.

The report covers prevalence for glaucoma worldwide and discusses the ophthalmologists who treat glaucoma. It also examines the role of surgical intervention, the market dynamics for currently commercialized products, and the pipeline of investigational devices that may offer improved outcomes. Product demand is forecast in units and dollars, and market shares are analyzed by product category. Twenty-four market competitors are profiled, with discussion of their products, strategic market position, background, and outlook.

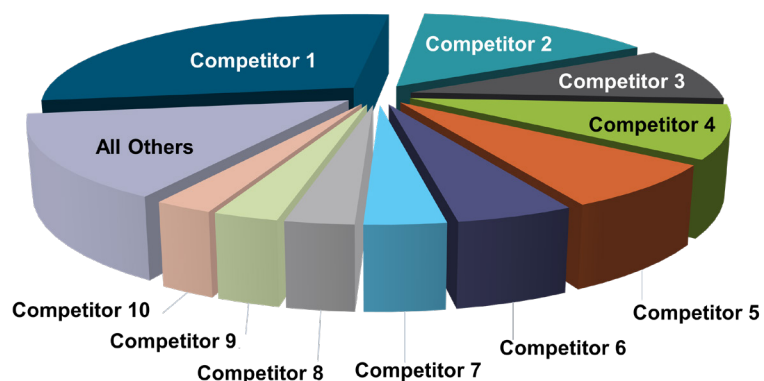

Coverage includes:

- Background information about glaucoma, glaucoma populations, and glaucoma diagnosis.
- Estimates of current sales and sales forecasts for glaucoma devices, including average prices and total revenue.
- Profiles of prospective device buyers, including ophthalmologists, ophthalmic specialists, optometrists, and general medical doctors.
- Information about manufacturers.
- Current reimbursement rates.

Global Glaucoma Surgery Treatment Mix— Historical and Projected

Competitors in the Global Glaucoma Surgical Products Market by Revenue Share

The report also highlights emerging laser technologies that have the potential to dramatically expand the use of lasers in glaucoma, such as the Belkin DSLT laser, ViaLase femtosecond laser, Elios ELT laser, and IOptimate CO2 laser.

In addition, the report tracks advancements in sustained drug delivery devices, providing insights into ongoing progress in this field.
