What's New

AUTHOR
Peter Downs

PUBLISHED
March 2025

The new “2025 Retinal Device Market Report” now covers medical treatment devices; features an expanded disease section with separate forecasts for diseases treated with surgery and diseases treated with medical devices; and features new forecasts for surgical procedures and medical device procedures.

The report includes updated global and regional forecasts for vitrectomy procedures, machine sales, and installed base; analysis of the average age of vitrectomy machines in the US and Western Europe; and comparisons of US and Western European use of small-gauge instruments and tamponades.

Market Scope

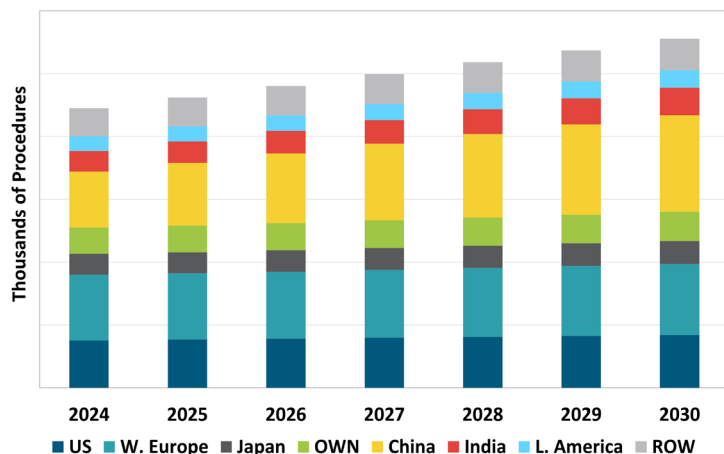

2025 Retinal Surgical Device Market Report

The “2025 Retinal Surgical Device Market Report” provides in-depth analysis of the global retinal device market, examining the market’s size and growth, as well as identifying important developments that may shape its future. The analysis focuses on the 2025 market and forecasts market growth and evolution through 2030.

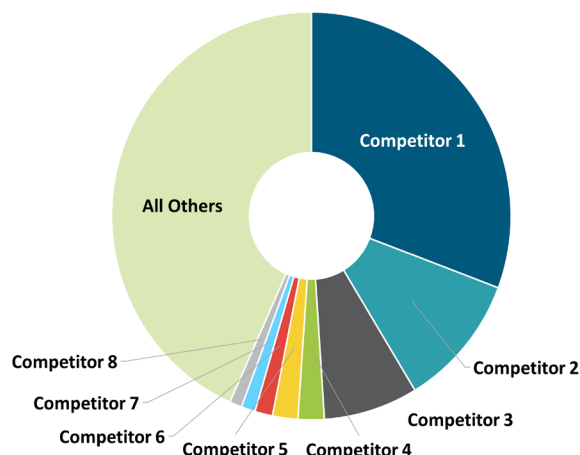

It covers currently commercialized devices, as well as device technologies in development, and provides forecasts for future market activity. Topics include retina physiology, the epidemiology of retinal disease, patient economics and reimbursements, and retina specialists who provide care. Additionally, 19 retina device companies are profiled, with discussion of their products, strategic market position, background, and outlook. Coverage also includes:

- Factors shaping demand for vitrectomy devices
- Prevalence data for diseases that lead to surgery
- Vitrectomy machines and machine packs
- Emerging vitrectomy technologies
- Allied surgical devices
- Retinal surgical instruments
- Photobiomodulation
- Implantable telescopic IOLs
- Artificial vision technologies
- 21 company profiles
